

MOHAMED TAMER MOHAMED ELSAYED

Software Engineering Student | AI/ML Engineer | Software Tester | Team Lead
+20 1200660007 | Cairo, Egypt | mohammed.tamer.mot@gmail.com | <https://linkedin.com/in/mohamed-tamer-53113a230> | <https://github.com/mohamedtamer2006>

SUMMARY OF QUALIFICATIONS

- Software Engineering student with hands-on exposure to software testing, AI/ML fundamentals, and full-stack development tooling
- Completed multiple government- and industry-backed technical programs spanning generative AI, responsible AI, cybersecurity, and software testing
- Proficient in Java, C++, and Python; comfortable across multiple IDEs and AI-assisted development environments
- Active competitive programmer and continuous learner, seeking an internship or entry-level role in AI/ML or software development

EDUCATION

Cairo University – Faculty of Computing and Artificial Intelligence <i>Bachelor of Science in Software Engineering</i> • Cumulative GPA: 2.9 / 4.0 • Third Year	Cairo, Egypt Expected 2028
---	-------------------------------

Relevant Coursework: Data Structure & Algorithms | OOP | Database Systems | Discrete Mathematics | Software Engineering principles

SKILLS

Programming Languages: Java | C++ | Python
Backend & Frameworks: Flask | OOP | Backend Development | Maven(Automation Testing)
Data & AI: Agentic AI | Machine Learning | Deep Learning | NLP | SQL | Data Structure | Algorithms | DB Systems
Development Tools & IDEs: Visual Studio | IntelliJ IDEA | CLion | Antigravity | Git | GitHub | Selenium | SonarQube
AI/ML Tools: Hugging Face | Google Cloud Generative AI Studio | Microsoft Azure | MLOps | MLflow
Soft Skills: Team Leadership | Communication | Presentation | Problem Solving | Time Management
Languages: Arabic (Mother tongue) | English (B1__intermediate) | German (A2__Beginner)

RELATED EXPERIENCE

Microsoft Machine Learning Intern <i>Digital Egypt Pioneers Initiative (DEPI) – Ministry of Communications and Information Technology (MCIT)</i> July 2026–Present • Selected for the Machine Learning track, focusing on machine learning fundamentals, data analysis, and AI technologies. • Developing practical skills through technical training, projects, and hands-on learning.	
Software Testing Intern <i>Digital Egypt Pioneers Initiative (DEPI) – Ministry of Communications and Information Technology</i> June – December 2025 • Trained in the Software Development track with a specialization in Manual Testing and Automation Testing under a nationally sponsored technology program • Practiced structured test-case design and defect identification on a full-stack sample application • Completed a parallel Business English track to strengthen technical communication and documentation skills	Blended
Cybersecurity Intern <i>National Telecommunication Institute (NTI) – Ministry of Communications and Information Technology</i> July – August 2025 • Trained in the Cybersecurity track with a specialization in Networks under a nationally sponsored technology program	Blended

PROJECT EXPERIENCE

PHP Travel Booking System – Software Testing <i>Digital Egypt Pioneers Initiative (DEPI) – Ministry of Communications and Information Technology Team Lead</i> • Designed and executed test cases covering booking, search, and payment workflows for a travel booking web application • Identified and logged functional defects, working with the development team to verify fixes • Applied Manual Testing techniques and Automation Testing to validate application behavior against expected requirements • Led a 5-member team — managed delivery timeline, defined system architecture, and directed all technical decisions. • Tools: IntelliJ Selenium Excel Maven(Java Framework)	November – December 2025
---	--------------------------

Online Quiz Platform – Software Development

May 2026

Cairo University | Team Member

- Built a full-stack online exam/quiz platform using Node.js, Express, and EJS for server-side rendered views.
- Implemented core exam features including quiz creation, quiz-taking, exam history tracking, and user profile pages.
- Added user authentication flows with dedicated sign-in, log-in, and registration pages.
- Used SQLite for data persistence and configured the app for deployment on Vercel .

Soccer League System – Java Development

September 2025

Digital Egypt Pioneers Initiative (DEPI) – Ministry of Communications and Information Technology | Individual

- Built a Java desktop application for managing soccer-related data (teams, players, or matches).
- Integrated a relational database backend, with a dedicated SQL script to define schema and seed data.
- Combined application logic with persistent data storage, demonstrating basic database-driven app design.
- Tools: IntelliJ IDE | Java | OOP | Database | Microsoft SQL Server

Renewable Energy Grid Maintenance Network – Database Systems

May 2026

Cairo University | Team Lead

- Built a full-stack web application for managing renewable energy sites, power units, technicians, and maintenance inspections.
- Developed the backend with Node.js and Express.js, using raw SQL via the mssql driver for all database operations.
- Designed a Microsoft SQL Server schema and wrote 6+ analytical SQL queries for operational reporting and a dashboard summary view.
- Implemented a vanilla JavaScript single-page frontend with light/dark theming, covering CRUD for sites, technicians, certifications, and inspection rounds.
- Led a 5-member team — managed delivery timeline, defined system architecture, and directed all technical decisions
- Tools: Microsoft SQL Server | Visual Studio | Flask (Python Framework) | HTML | CSS | JavaScript

SafePathAI – AI For All Hackathon

2026

Team ResiliAfrica | AI/ML Developer

- Built SafePathAI, an AI-powered disaster early-warning and evacuation route guidance platform, as AI/ML Developer on team ResiliAfrica.
- Proposed clearer per-zone risk explanations (hazard, exposure, vulnerability) and a shift from a control-dashboard interface to a proactive, user-friendly alert experience.
- Designed features to minimize user input to route selection, add a guiding chatbot with mental-health and calm support, and expand multi-language support.
- Contributed to predictive risk-escalation modeling and a "meet me in the middle" feature for rescue-team interconnectivity.

CERTIFICATIONS & TRAINING

- Digital Egypt Pioneers Program (DEPI) – Software Development, Software Tester Track (June–December 2025)
- AI For All Hackathon – Certificate of Completion (2026)
- Digital Egypt Pioneers Program (DEPI) – Business English Track (June–December 2025)
- National Telecommunication Institute (NTI) – Cybersecurity Academy (2025)
- Huawei ICT Academy – HCIA-AI V4.0 Course (September 2026)
- Google Cloud – Introduction to Generative AI Studio (March 2026)
- Google Cloud – Introduction to Responsible AI (March 2026)
- Introduction to Modern AI — Cisco Networking Academy (July 2026)
- IBM SkillsBuild – Exploring Artificial Intelligence (July 2026)
- Digital Egypt Cubs Initiative – Level Two Nanodegree, MCIT / Udacity (October 2023)

LEADERSHIP & INVOLVEMENT

- Participant, Nile University Competitive Programming Arena (NUCPA) 2026 – online round (February 2026)

AI for All Hackathon

2026

Participant

- Successfully completed all three phases of the AI for All Hackathon, progressing from AI-focused training and ideation to solution development and the final regional phase in Alexandria, Egypt.
- Collaborated with a team to develop an AI-based solution addressing real-world challenges related to disaster resilience and early warning systems.
- Gained hands-on experience in AI, problem-solving, teamwork, innovation, and pitching.
